

HEAT PUMPS
UP20

KICK BACK WITH HIGH-QUALITY COMFORT

The EcoNet® Enabled, Inverter-Driven Ruud® Ultra™ Series Variable Speed Heat Pump offers the solid technology and energy-saving performance you've come to expect from Ruud. The quiet comfort is definitely a step up in comfort—for your entire family.

ULTRA SERIES UP20

Cooling Efficiencies up to 20 SEER / 14 EER
Heating Efficiencies up to 11.5 HSPF

Variable-Speed Technology Is Smart Comfort

With variable-speed technology, you can rely on your heat pump to adapt quickly and consistently to your heating and cooling needs, regardless of the conditions outside.

Energy Efficiency & Savings

Ruud's Variable Speed Heat Pump provides cooling efficiencies up to 54% higher and heating efficiencies up to 58% higher than typical heat pump designs. You can also expect more than \$7,000 in lifetime savings². Ruud inverter-driven technology provides just the right amount of heating and cooling under all conditions for dependable comfort and energy savings year-round.

Quiet & Efficient Operation

By running at lower speeds throughout the day, our variable speed model streamlines airflow and reduces vibration, running quieter than other systems.

Smart Controls & Alerts

Innovative EcoNet technology sends you important alerts and reminders to keep your system working at its best. Plus, it's easy to adjust your comfort settings from home or away³.

RELY ON RUUD.™

Ruud.com

SAVINGS: Variable-Speed Efficiency

A typical variable-speed unit is capable of adjusting its capacity to meet building loads under a wide range of outdoor temperatures. Because inverter-driven solutions operate more efficiently, they actually perform better AND save on energy costs.

**Most commonly replaced system. Energy savings shown are calculated per AHRI (Air Conditioning, Heating, and Refrigeration Institute) annual operating costs and represent directional numbers most applicable to typical cooling and heating requirements within the mid-latitudes of the U.S.*

ANNUAL ENERGY COST SAVINGS FOR COOLING 10.0-SEER BASELINE*

ANNUAL ENERGY COST SAVINGS FOR HEATING 6.8-HSPF BASELINE*

UNIT CAPACITY 2-Ton 3-Ton 4-Ton 5-Ton

Inverter-Driven Comfort Month After Month

EcoNet® Enabled, Inverter-Driven Ruud® Ultra Series Variable Speed Heat Pumps deliver **smart comfort and energy-saving performance**. With inverter technology, the variable-speed compressor adapts to handle everything from the mildest spring and fall days, to harsh winters, to sweltering summers—precisely, reliably, and efficiently. This results in continual and efficient adjustments of your comfort needs, offering more precise all-day temperature, humidity, and indoor air quality control.

The compressor found in the Ultra Series Heat Pump provides **superior performance and reliability**. Variable speeds allow your unit to adapt to surrounding conditions with more precision and efficiency, avoiding temperature fluctuations that are sometimes associated with standard single-stage systems. And because your variable-speed system is efficiently adjusting to your heating and cooling needs, it's also able to deliver humidity and indoor air quality control that is not possible with standard on / off single-stage designs.

Energy-Saving Efficiency Meets High Performance

It's also easy to **save on energy costs** with the Ultra Series Heat Pump. The variable-speed operation **outperforms single-stage systems** and provides you with a new level of adaptability and precision. While that means more comfort for your home, it also means more energy savings. The UP20 Heat Pump also provides the extra heat needed on those cold winter days and nights, reducing the costly expense of auxiliary heating. In fact, the Ruud Variable Speed Heat Pump is capable of meeting a building's heating load down to approximately 0° F⁴. The overdrive feature maintains your home's comfort when outside temperatures are as high as 107° F. To get the most performance from your unit, count on a variable speed heat pump from Ruud.

Engineered for Energy-Saving Performance

The *Ultra™* Series Heat Pump knows how to efficiently keep the temperature right where it needs to be. Since it has variable speeds, it can adjust to meet non-peak heating and cooling demands. So leave the thermostat alone and let your heat pump do the work—for superior, money-saving performance that’s always in season.

Count on Staying Comfortable in Every Season

A smart, efficient design makes the Ruud *Ultra* Series Heat Pump one of your best options for staying comfortable inside. Each new unit includes a generous list of features that work together to bring you quiet, efficient, and reliable indoor comfort.

Reliable & legendary

1 **Scroll compressor technology** makes the *Ultra* Series as efficient as it is durable. The 2 **optimized fan orifice** also contributes to quieter operation, optimal airflow, and better overall performance. Simply put, you get efficient comfort that lasts a very long time. The built-in defrost capabilities are an added benefit that means your unit spends less time defrosting and more time warming your home.

A quieter & more durable unit

The smart new 3 **composite base pan’s** design helps eliminate corrosion and adds to quieter performance. Extensive UV testing was done to ensure the base pan stays looking new for years to come. Ruud-brand enhanced mufflers and improved refrigerant tubing design also contribute to a quieter, more reliable operation. For added strength, 4 **curved louver panels** and 5 **rugged corner posts** on the exterior do an excellent job of protecting the inside.

Curb appeal

Ruud heat pumps look as good as they operate. Modern cabinet aesthetics allow your unit to put its best face forward, and a powder coat paint system provides a lasting, professional finish.

Fast & accurate installation & maintenance

Your savings start with the installation of your new unit. Ruud *Ultra* Series Heat Pumps are built to go in fast and easy. The 6 **easy to access control box**, and roomy diagnostic service window mean maintenance calls go quickly, saving you time and money.

The Ruud *Ultra* Series Variable Speed Heat Pump is designed to operate with the EcoNet Smart Thermostat. This easy-to-use thermostat optimizes system performance and includes great features like:

- Simple scheduling and one-touch energy savings
- Remote access via the EcoNet App
- Important equipment alerts sent directly to your phone or email
- Convenient voice control – just ask “Alexa, make home cooler”⁵

Ruud Philosophy of Reliability

Designed to keep your family comfortable for years to come, Ruud® products are developed using the 360°+1 design philosophy. The Ruud brand strives to deliver the very best homeowner experience by evaluating every detail of the product from every angle. That's 360°+1. And that's why you can rely on Ruud air and water solutions to bring you and your family years of comfort.

How To Speak Heating & Cooling

Single-Stage

One level of operation, with no differentiation between peak or non-peak heating and cooling demands.

Variable-Speed

Varying levels of operation based on cooling needs. This modulating technology provides more precise temperature control, lower humidity, and greater efficiency.

Efficiency

Description for how effectively incoming energy is converted to outgoing energy. The higher the number, the more efficient the unit—and the lower the operating costs.

HSPF

Heating Seasonal Performance Factor is used to express the efficiency of heat pumps. The higher the HSPF, the more efficient the unit.

SEER

Seasonal Energy Efficiency Rating is used to express the efficiency of an air conditioning unit, or a heat pump in cooling mode. The higher the SEER rating, the more efficient the unit.

EER

Energy Efficiency Ratio is the cooling capacity of the air conditioner in BTUs per hour to the total electrical input in watts. This measure is determined by comparing test units to the Air Conditioning and Refrigeration Institute specifications.

Compressor

The compressor plays an integral role in cooling your home. It is responsible for pumping refrigerant through the refrigerant lines and the coil, making the transfer of heat from inside your house to the outdoors possible.

Ready to upgrade or replace your old system?

Visit Ruud.com today to learn more.

Benefits At-A-Glance

Cooling Efficiency:

Up to 20 SEER / 14.5 EER

Heating Efficiency:

Up to 11.5 HSPF

Sound Level:

Features like the smart new composite base pan contribute to sound levels as low as 59 dBA

Compressor:

Inverter-driven, variable-speed scroll compressor with modulating technology.

Warranty⁶:

Parts—10-year
Conditional unit replacement—10-year

RUUD HEATING, COOLING & WATER HEATING

As the only brand bringing innovative air and water solutions to homes and businesses around the world, Ruud continues to deliver advanced comfort, savings and experiences to our customers—just as we've done for over 100 years.
