

COMFORT THAT EXCEEDS EXPECTATIONS

The EcoNet® Enabled, Inverter-Driven Ruud® *Ultra™* Series Variable Speed Air Conditioner offers the solid technology and energy-saving performance you can count on. It's also quiet, for a comfort that goes above and beyond your expectations.

Ruud.com

ULTRA SERIES UA20

Efficiencies up to 20 SEER / 13 EER

Variable-Speed Technology Is Smart Comfort

When outside conditions heat up, Ruud variable-speed technology quickly and consistently adapts to your inside cooling needs.

Energy Efficiency & Savings

The *Ultra* Series provides efficiencies up to 54% higher than typical air conditioning designs and an expected lifetime savings of \$3,720².

Quiet & Efficient Operation

By running at lower speeds throughout the day, the variable-speed model runs quieter than other systems—and by streamlining airflow and reducing vibration, these models were made to run quieter than ever.

Smart Controls & Alerts

Innovative EcoNet technology sends you important alerts and reminders to keep your system working at its best. Plus, it's easy to adjust your comfort settings from home or away³.

RELY ON RUUD.™

SAVINGS: Variable-Speed Efficiency

A typical variable-speed unit is capable of adjusting its capacity to meet building loads under a wide range of outdoor temperatures. Because inverter-driven solutions operate more efficiently, they actually perform better AND save on energy costs.

**Most commonly replaced system. Energy savings shown are calculated per AHRI (Air Conditioning, Heating, and Refrigeration Institute) annual operating costs and represent directional numbers most applicable to typical cooling and heating requirements within the mid-latitudes of the U.S.*

ANNUAL ENERGY COST SAVINGS FOR COOLING 10.0-SEER BASELINE*

Inverter-Driven Comfort Month After Month

EcoNet® Enabled, Inverter-Driven Ruud® *Ultra* Series Variable Speed Air Conditioners deliver **smart comfort and energy-saving performance** you expect from Ruud. With inverter technology, as the unit works to adjust to your cooling needs, indoor fan speeds sync with the compressor's speed to match air input and output. This results in a continual and efficient adjustment to your comfort needs, offering more precise all-day temperature, humidity and indoor air quality control.

The compressor found in the *Ultra* Series Air Conditioner provides **superior performance and reliability**. Variable speeds allow your unit to adapt to surrounding conditions with more precision and efficiency, avoiding temperature fluctuations that are sometimes associated with standard single-stage systems. And because your variable-speed system is efficiently adjusting to your cooling needs, it's also able to deliver humidity and indoor air quality control that is not possible with standard on / off single-stage designs.

Energy-Saving Efficiency Meets High Performance

It's also easy to **save on energy costs** with the *Ultra* Series Air Conditioner. The variable-speed operation **outperforms single-stage systems** and provides you with a new level of adaptability and precision. While that means more comfort for your home, it also means more energy savings. The overdrive feature on the UA20 Air Conditioner maintains your home comfort when temperatures are as high as 107°F. If you're interested in getting the most from your unit, count on a variable-speed air conditioner from Ruud.

Engineered for Energy-Saving Performance

The variable-speed operation on the *Ultra™* Series Air Conditioner knows how to keep the temperature efficiently right where it needs to be. Since it has variable speeds to choose from, it can adjust to meet non-peak cooling demands. So leave the thermostat alone and let your air conditioner do the work—for superior, money-saving performance that's always in season.

Count on Staying Comfortable in Every Season

A smart, efficient design makes the EcoNet Enabled Ruud *Ultra* Series Variable-Speed Air Conditioner one of your best options for staying cool inside. Each new unit includes a generous list of features that work together to bring you quiet, efficient and reliable indoor comfort.

Reliable & legendary

1 **Variable-Speed Copeland Scroll™ compressor**⁴ makes the *Ultra* Series as efficient as it is durable. The compressor, outdoor fan and indoor fan adjust with the changing outdoor conditions to provide the perfect temperature and greater dehumidification. The compressor also has 70% fewer moving parts—which means you get a unit that's more efficient and more reliable. The 2 **optimized fan orifice** contributes to quieter operation, optimal airflow, and better overall performance. Simply put, you get efficient comfort that lasts a very long time.

A quieter & more durable unit

The smart new 3 **composite base pan** design helps eliminate corrosion and adds to quieter performance. Extensive UV testing was done to ensure the base pan stays looking new for years to come. Ruud improved refrigerant tubing design also contributes to a quieter, more reliable operation. For added strength, 4 **curved louver panels** and 5 **rugged corner posts** on the exterior do an excellent job of protecting the inside.

Curb appeal

Ruud air conditioners look as good as they operate. Modern cabinet aesthetics allow your unit to put its best face forward, and a powder coat paint system provides a lasting, professional finish.

Fast & accurate installation & maintenance

Your savings start with the installation of your new unit. Ruud *Ultra* Series Air Conditioners are built to go in fast and easy. The control box is also easy to access, and a roomy diagnostic service window means maintenance calls go quickly, saving you time and money.

The Ruud *Ultra* Series UA20 Variable-Speed Air Conditioner is designed to operate with the EcoNet Smart Thermostat. This easy-to-use thermostat optimizes system performance and includes great features like:

- Simple scheduling and one-touch energy savings
- Remote access via the EcoNet App
- Important equipment alerts sent directly to your phone or email
- Convenient voice control – just ask “Alexa, make home cooler”⁵

Ruud Philosophy of Reliability

Designed to keep your family comfortable for years to come, Ruud® products are developed using the 360°+1 design philosophy. The Ruud brand strives to deliver the very best homeowner experience by evaluating every detail of the product from every angle. That's 360°+1. And that's why you can rely on Ruud heating and cooling solutions to bring you and your family years of comfort.

How to Speak Heating & Cooling

Two-Stage

Two levels of operation, which saves energy during non-peak cooling demands.

Three-Stage

More than one level of operation—low, medium and high—which saves energy during non-peak cooling demands.

Variable-Speed

Varying levels of operation based on cooling needs. This modulating technology provides more precise temperature control, lower humidity and greater efficiency.

Efficiency

Description for how effectively incoming energy is converted to outgoing energy. The higher the number, the more efficient the unit—and the lower the operating costs.

SEER

Seasonal Energy Efficiency Rating is used to express the efficiency of an air conditioning unit, or an air conditioner in cooling mode. The higher the SEER rating, the more efficient the unit.

EER

Energy Efficiency Ratio is the cooling capacity of the air conditioner in BTUs per hour to the total electrical input in watts. This measure is determined by comparing test units to the Air Conditioning and Refrigeration Institute specifications.

Compressor

The compressor plays an integral role in cooling your home. It is the device responsible for pumping refrigerant through the refrigerant lines and the coil, making the transfer of heat from inside your house to the outdoors possible.
