WHY ADP?

Advanced Distributor Products (ADP) started with a vision to produce the best evaporator coils in the country. In 1992, ADP began production in Grenada, Mississippi, and started developing innovative products that are fully supported by a research and development laboratory, which includes areas for testing, assembling, and designing future products.

Today, ADP offers a wide range of premier HVAC products with exclusive design advantages. We pride ourselves on our quality, flexibility, and solutions. We design our products to fit any application and simplify installation. And we're always open to new partnerships with businesses and the communities we serve.

QUALITY

- Leading US manufacturer of evaporator coils and air handlers
- Built to the highest quality standards
- Microban® antimicrobial technology
- Advanced performance testing simulation software

FLEXIBILITY

- Broadest product line in the industry – thousands of variations available
- Products designed to match perfectly with any system
- Personalized programs for distributor partners
- Custom product strategies to meet local needs

SOLUTIONS

- Short lead times
- Low warranty rates with simple claim process
- Insights from industry experts
- Focused on distributor and dealer success
- Quick and easy installation in the field

THE ADP ADVANTAGE

There's a reason ADP is the #1 producer of evaporator coils in the USA. Our coils are designed to match perfectly with any system, excelling in appearance and performance. And our coil line can accommodate any application need.

ALL ADP EVAPORATOR COILS OFFER

Innovative and efficient designs that maintain a minimal footprint

Installation flexibility and efficiency

Increased system performance

Available 10-year extended warranty with registration

Out-of-the-box installation

Industry-exclusive Microban® anti-microbial product protection on every Healthy Solutions® coil

Factory installed TXV's with bolt on connections

Both copper and aluminum coils available

EVAPORATOR COIL APPLICATION

An evaporator coil plays a crucial role in the operation of an air conditioner or heat pump by gently drawing warmth from the air within the home. It's positioned within the air handler or connected to the furnace.

Nestled within the blower compartment or air handler, the evaporator coil serves as a reservoir for the cooled refrigerant that the compressor sends its way. As the blower fan guides air over the coil, the refrigerant's chilly temperature effectively extracts heat from your indoor air, leaving you with a more comfortable environment. Subsequently, the refrigerant, now carrying the warmth it collected, embarks on a journey to the outdoor condenser coil. In the case of a heat pump, this process takes on a role reversal during winter. Here, the evaporator coil releases heat from the refrigerant into your home, counteracting the chill instead of sending it outside.

In this way, the evaporator coil silently contributes to the coziness of your living spaces while also being versatile enough to adapt to seasonal variations in temperature.

FLEX COIL

WHAT IS FLEXCOIL?

FlexCoil is ADP's A2L solution that works with both R-32 and R-454B. ADP's FlexCoil is designed to help HVAC distributors and dealers succeed during this year's refrigerant transition.

WHAT MAKES FLEXCOIL THE RIGHT CHOICE?

Flexibility for distributors

- **Maximizes inventory flexibility:**
The same coil can be used for R-32 or R-454B with just a metering device change

Easy installation for dealers

- Provides a full line of coils certified for both A2L refrigerants
- Field or factory-installed Refrigerant Detection System (RDS)
 - Single RDS with dual-calibrated sensor for both R-32 and R-454B
 - Field RDS offers one kit with everything needed to make an easy refrigerant change
- All ADP FlexCoil products come with the sensor bracket preinstalled in the approved location and have mechanical fit connections to install or change the metering device, such as a TXV

WHEN WILL FLEXCOIL BE AVAILABLE?

FlexCoil is available now! Contact your ADP sales representative for more details.

Factory Refrigerant	Factory RDS
R-32	Yes
R-32	No
R-454B	Yes
R-454B	No

Field TXVs	Field RDS
R-32	Dual: R-32 & R-454B

EVAPORATOR COIL PRODUCT OFFERING

FlexCoil A2L + Legacy A1 models available

Multi-Position & Dedicated Downflow

HE & Dedicated Downflow Series

Lower heights and variable widths for a perfect furnace fit

Horizontal Top Connection

V Series

Dedicated horizontal coils offer strategic attic solutions over standard MP coils

Horizontal Side Connection

HD Series

Dedicated horizontal coils offering the perfection solution for crawl spaces

Plenum Coil

PL Series

Dedicated horizontal coil with an integrated plenum for fast installation

Horizontal Slab

HH Series

Dedicated horizontal slab coils great for replacement of legacy applications

Manufactured Housing

M Series

Mobile home applications with sized out down-turned headers for easy line brazing

Service Coils

SC Series

Service coils offering the perfect replacement for 8-12 SEER coils

MULTI-POSITION - HE SERIES

FLEXCOIL A2L & LEGACY A1 MODELS

Scan the QR code
to learn more

Lower heights and variable widths for a perfect furnace fit

Cased, uncased, multi-position and upflow/downflow configurations

Built-in plenum flanges with rounded corners for fast and safe installation

Front panel with only four screw access and non-captive refrigerant lines for fast and easy coil access

Available in copper or aluminum

Painted cabinet options for furnace color coordination

Improved Air Quality

Microbes can double every 20 minutes on an untreated surface!

Standard plastic pan with visible mold

Plastic pan with Microban® antimicrobial additive

Mold is part of our environment and there are no practical ways to completely eliminate mold spores.

The best defense against mold in a home is to prevent it from taking hold through moisture control and the use of mold resistant building materials.

Lower Height

ADP provides space saving opportunities and a perfect fit with your furnace!

DEDICATED DOWNFLOW

FLEXCOIL A2L & LEGACY A1 MODELS

Scan the QR code
to learn more

Short height to fit constrained spaces

Fits furnace with no additional support needed

Better air flow for higher performance versus N-coil

Out-of-the-box reliable downflow solution and no kit needed

Front panel with only six screws for fast and easy coil access; non-captive refrigerant lines

Perfect Fit

- Full depth cabinet for a sturdy installation
- Perfect width fit for a cleaner design
- Braced cabinet for added strength

Short Height

- Fits in height constrained spaces
- Space savings opportunities

* See spec guide for available models

HORIZONTAL TOP CONNECTION - V SERIES

FLEXCOIL A2L & LEGACY A1 MODELS

Scan the QR code
to learn more

Dedicated horizontal coils offer strategic attic solutions over standard MP coils

Top refrigerant connections eliminating counter flow and line re-routing

Dual condensate drains on each side for additional installation flexibility

Top panel with only four screws for fast and easy coil access

Available in copper or aluminum

Painted cabinet options for furnace color coordination

Improved Air Quality

Microbes can double every 20 minutes on an untreated surface!

Standard plastic pan with visible mold

Plastic pan with Microban® antimicrobial additive

Mold is part of our environment and there are no practical ways to completely eliminate mold spores.

The best defense against mold in a home is to prevent it from taking hold through moisture control and the use of mold resistant building materials.

Perfect Attic Solution

Dedicated horizontal coils offer a quality advantage over standard multi-position coils!

Perfect Furnace Fit

Coil height matches furnace width, no adapter required

5 Ton Attic Access

21" solution easily passes through 22" attic opening

Top Refrigerant Connections

Eliminates counter flow and line re-routing

PLENUM COIL - PL SERIES

FLEXCOIL A2L & LEGACY A1 MODELS

Scan the QR code
to learn more

Dedicated horizontal coil with Integrated plenum for fast installation

Built-in handle allows for easy lifting through tight spaces, such as an attic

Top refrigerant connections and dual condensate drains for installation flexibility

Top panel with only four screw access and UV light knockouts for installation flexibility

Pilot holes for fast secondary drain pan attachment

Improved Air Quality

Microbes can double every 20 minutes on an untreated surface!

Standard plastic pan with visible mold

Plastic pan with Microban® antimicrobial additive

Mold is part of our environment and there are no practical ways to completely eliminate mold spores.

The best defense against mold in a home is to prevent it from taking hold through moisture control and the use of mold resistant building materials.

All-in-One Solution

ADP provides a light weight plenum coil solution with premier features and benefits!

Mobility

Light weight aluminum evaporator coils with aluminum header plates

Attic Access

Built-in handle allows easy lifting through tight spaces

Top Refrigerant Connections

Eliminates counter flow and line re-routing

Nomenclature

HORIZONTAL SIDE CONNECTION - HD SERIES

FLEXCOIL A2L & LEGACY A1 MODELS

Scan the QR code
to learn more

Dedicated horizontal coils offering the perfection solution for crawl spaces

Counterflow capable to meet any airflow direction

Side refrigerant connections for easy access to coil

Built-in plenum flanges with rounded corners for fast and safe installation

Available in copper or aluminum

Improved Air Quality

Microbes can double every 20 minutes on an untreated surface!

Standard plastic pan with visible mold

Plastic pan with Microban® antimicrobial additive

Mold is part of our environment and there are no practical ways to completely eliminate mold spores.

The best defense against mold in a home is to prevent it from taking hold through moisture control and the use of mold resistant building materials.

Crawl Space Solutions

Dedicated horizontal with side refrigerant connections are perfect for crawl space application!

Low Height

Perfect for crawl space under houses

Side Refrigerant Connections

Easy to access coil

MANUFACTURED HOME - M SERIES

FLEXCOIL A2L & LEGACY A1 MODELS

Scan the QR code
to learn more

Designed for manufactured housing applications - Works perfectly with our mFurnace
manufactured housing electric furnace

Filter friendly top plate

Sized out down-turned headers for easy line brazing

Coils charged with dry air for greater flexibility with both R-22 and R-210A applications

Low water retention drain pan design with built-in downflow drip shields

Blow-off Protection & Improved Air Quality

ADP provides enhanced protection to prevent condensate blow-off and improve overall air quality. Our manufactured housing evaporator coils are designed to remove unhealthy standing water from the drain pan.

Reduce Condensate Blow-off

Specially designed downflow drain pan for added protection

Reduced Installation Time

Drip shield molded into pan, no installation required

Sloped Drain Pan

Superior drainage versus standard manufactured housing coils

Moisture Control

Reduced opportunities for growth of mold and bacteria due to standing water

to learn more

Perfect replacement for 8-12 SEER coils

Sized for legacy installations

Same features as rated coils

Embossed cabinets for universal furnace match

Supplied with pistons for both R-22 and R-410A application

The Premier Replacement Coil for Any System

- Service coil for indoor coil replacement only; for new systems, please see our Premier Evaporator Coil product line
- Same features as rated coils
- Perfect replacement for 8–12 SEER coils
- Sized for legacy installations
- Supplied with pistons for both R-22 and R-410A applications
- Access port for easy TXV installation
- “No Hassle” 5-year warranty
